

What Parents Say About the Learning Experience Kindergarten Program **

"Selecting a Kindergarten in Calgary was a difficult decision for us as a family living in the deep South and deciding what school to take our daughter.

We initially thought as parents that it wouldn't matter what Calgary school we send our daughter to kindergarten, public school or private school. We couldn't be more wrong.

Now that our daughter is in Calgary public grade one, we have learned that the Kindergarten program offered at Learning Experience was the best decision we have ever made. Our daughter excels in everything and we believe that is a direct result of having her in the kindergarten class at Learning Experience.

Kindergarten classes at Learning Experience is more than playing with blocks and colouring between the lines. Their program teaches the fundamentals that we use everyday and what some of us adults have forgotten, such as simply being polite, taking turns, paying attention, learning to listen, to have confidence and be considerate to others, just to name a few. Academics can be taught by any school, but Learning Experience teaches what a child will use everyday.

Mrs. K. and her team are just that, a team. Everyone works together and it shows from from administration to faculty. My child still remembers her teachers by name. All of the kids adore Mrs. K. and the end of the year was the hardest when they had to say goodbye.

I wish there more programs for grade 1 to 4. My daughter would be there now if they offered this.

I still from time to time visit the teachers and staff just to say hello, because they have made such a positive impact on my child."

Zee Z.

"My son attended the kindergarten in 2013-2014 session. The curriculum itself is very enhancing and under the guidance of Mrs. K and Mrs. J. it turned out to be very enriching for my child. He learned basics of science experiments, math facts, art history and phonograms. The most important of all he turned out to be a very strong reader that helped him in his grade 1 at FFCA as well. He smoothly adjusted to his more demanding routine in the new school. Surely he developed a sound base at your school and now he is an A+ student in grade 2."

Rabia M.

Smaller classes and individualized attention helped our two girls build confidence with a variety of activities and learning in preparation for Grade 1. This has helped them to continue to be successful at their new school in Grade One.

Paul and Michelle T.

I spent many sleepless nights trying to find the right preschool for both of my children. I know that not all preschools are created equal and, being a teacher myself, I am aware that my expectations are extremely high.

I was looking for a preschool that made my children feel special and unique whilst providing them with the academic skills necessary to transition from pre-school to "Big Kid School". The Learning Experience staff welcomed our family with open arms. The genuine affection and concern that the staff show the children at the school truly makes The Learning Experience a "home away from home". I know it is rare to find a preschool with all of these outstanding qualities which is why I cannot recommend it enough to friends, family and anyone who wants a wonderful, caring and nurturing learning environment for their child.

Ana V.

"Our family has been coming to Learning Experience for 9 years! All three kids have benefitted from learning and growing and feeling special through the preschool, Junior Kindergarten and Kindergarten programs. My main goal for my kids is for them to be happy. They have been happy every day at school. It has been a great start for them from self-esteem to being prepared academically in grade school."
